

The MSDC is a multispectral drone camera for easy integration to drones with PixHawk flight controllers enabling capture of geotagged aerial images for further analysis in data mapping software.

## FEATURES

- Captures co-registered spectral images simultaneously
- 4 bands – 450, 550, 650, 800 nm
- Anti-X-Talk™ Technology - enhances contrast and spectral performance
- Frame rates @ 89 FPS
- 4MP Global Shutter CMOS sensor
- Accommodates c-mount lenses
- Weight: camera 55g, computer 140g, gimbal 465g, total 660g
