1. Description

The MSMC-2-2 is a multispectral multicamera imaging system incorporating two multispectral cameras into a single housing. The MSMC-2-2-M42-M42-1-A version includes two monochrome cameras (MC2-2-M42-1-A). Each monochrome camera can be customized with a unique optical filter to enable simultaneous high resolution imaging at two different spectral bands.

Each camera has its own lens and views the scene (object) through a plate beam splitter. The beam splitter enables each camera to observe the same scene without parallax effects.

Both cameras are USB3 Vision and GenICam compliant offering many options for image acquisition software, SDKs and OS platforms. The system is supplied with Windows-based 2ndLook software providing easy setup and simultaneous recording of images from both cameras.

Both cameras come hardwired in a master/follower arrangement allowing one camera to trigger the other. This ensures simultaneous image capture on both cameras. Each camera can have independent exposure settings to accommodate differences in sensitivity of each camera.

The cameras and beam splitter are mounted on 3-degree of freedom (DOF) stages enabling alignment of the beam splitter and each camera to the scene (object) using an Allen key after removal of the lid. One camera has adjustments for roll, yaw and x. The second camera and beam splitter have adjustments for roll, pitch, and z.

Power is provided to each camera through the USB3 interface. The housing is constructed from thick aluminum for stability and hard anodized for durability. The housing is dustproof.

2. Specifications

Dimensions (H x W x D) – not including feet	116 mm x 250 mm x 250 mm
Foot adjustment	20-40 mm
Aperture	77 mm screw on protective glass filter. User replaceable.
Camera 1	MSC2-M42-1-A (4MP monochrome camera)
Camera 2	MSC2-M42-1-A (4MP monochrome camera)
Camera 1 spectral bands	Customer selected filters available
camera	
Camera 2 spectral bands	Customer selected filters available
camera	
Camera 1 mount	3 DOF – roll, yaw, y
Camera 2 mount	3 DOF – roll, pitch, z
Beam splitter mount	3 DOF – roll, pitch, z
Beam splitter options	Glass plate 50:50 (R/T). Other options available.

Distance between camera	Adjustable from 40 mm to 80 mm
C-mount and Beam splitter	
Lens options	1-inch fixed focal length, manual focus, manual iris, locking
	screws. Many options available.
Rear connector	2 x USB 3 Type-B (female)
Tripod mounting	4 x ¼-20 and 4 x M6 threaded holes on bottom near center
Construction	CNC 6061 Aluminum, Brass and Stainless-Steel hardware
Surface finish	Hard anodized black

3. Camera Sensors

Quantum efficiency of the MSC2-M42-1-A sensor is shown in Fig 3.1. Each camera can be equipped with bandpass, multipass, shortpass, longpass in the user specified spectral range.

5. Camera and Sensor Geometry

(a) General layout of cameras within the MSMC-2-2 showing orientation of cameras with respect to the beam splitter (BS) and the MSMC-2-2 coordinate system.

(b) Definition of yaw, pitch and roll with respect to the MSMC-2-2 coordinate system.
(c) Front view of sensor inside camera 1 and its relationship to the coordinate system of the MSMC-2-2. The letter 'E' indicates the orientation of the image of an object.
(d) Front view of sensor inside camera 2 and its relationship to the coordinate system of the MSMC-2-2. The orientation of the letter 'E' indicates that relationship to the coordinate system of the MSMC-2-2. The orientation of the letter 'E' indicates that the image of the object is a mirror image of the image obtained with camera 1. The image is flipped horizontally in software during operation.

5. SDKs

Included with the MSMC-2-2 is an industrial-grade SDK for camera control and image capture. The SDK is compatible with a variety of Windows, Linux and MacOS operating systems.

It includes drivers, libraries, documentation, and samples. Environments such as Python and OpenCV are also supported.

Operating System	Development Environments	SDK Includes		
Windows 11 (64bit)	Visual Studio 2005	Windows driver		
Windows 10 (32bit / 64bit)	Visual Studio 2008	Windows SDK		
Windows 8.1 (32bit / 64bit)	Visual Studio 2010	StApi (Visual C++, .net		
	Visual Studio 2012	Framework 2.0, C)		
	Visual Studio 2013	StGenTL module		
	Visual Studio 2015	Viewing Software (StViewer)		
	Visual Studio 2017	Sample Programs (Visual C++,		
	Visual Studio 2019	Visual C#, Visual Basic, C)		
	Visual Studio 2022	DirectShow Filter		
	MinGW (Minimalist GNU for	Documentation

MacOS 13 Ventura	Python 3.7.x	StApi (C++)		
MacOS 12 Monterey	Python 3.8.x	StGenTL module		
MacOS 11 BigSur	Python 3.9.x	Viewing Software (StViewer)		
	Python 3.10.x	Sample Programs		
		Documentation		
Linux 64bit x64	Python 3.7.x	StApi (C++, C)		
Linux 64bit ARM	Python 3.8.x	StGenTL module		
Linux 32bit ARM	Python 3.9.x	Viewing Software (StViewer)		
	Python 3.10.x	Sample Programs (C++, C)		
		Documentation		

6. Windows Software

2ndLook software is included with each system purchase. 2ndLook is an image acquisition software package offering a complete solution to the customers looking for a user-friendly way to connect and acquire images without any development experience necessary. 2ndLook provides real-time synchronized video recording from multiple cameras (GenICam-compliant USB3 Vision, GigE Vision, and DirectShow cameras) to popular file formats (AVI, TIFF, PNG, JPEG) (Fig. 6.1). It has an easy to use interface with interactive help and user guides.
